

POLYSEAL

POLYSEAL

Cap seals

- Polyseal is leading Manufacturer of tamper proof caps/seals for numerous consumer goods nationwide.
- Prevents opening or breakage of caps and lids before usage
- Enriches quality through absolute product safety
- Bright and colorful graphics allow for unlimited design possibilities
- Available for a variety of bottles and containers in all shapes and sizes

Shrink films

- As the prime trailblazer in the consumer packaging industry, Polyseal created shrink films especially ideal for both individual and group product bundling.
- Effectively resists surface moisture and oils
- Provides entirely safe and secure product bundling
- Allows aesthetic value of each product to shine through
- Covers assorted products in a multitude of diverse industries

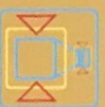

Shrink labels

- Doing away with conventional sticker labels, Polyseal manufactured its own film into shrink labels that cover and encase a wide selection of products:
- 360° decoration for maximum print area straight wall or contoured shapes
- Superior defense against handling damage
- High gloss label appearance and eye-catching shelf impact
- Remains the preferred shrink label for popular brands and choice products

GROUP PACKAGING

INDIVIDUAL PACKAGING

How to use

1. Apply product with the cap seals / labels & shrink films.
2. Expose to any heat source.
3. Heat source: heating tunnels, hair dryer, etc.
4. The plastic will shrink securely in place.

"CORPORATE PROFILE"

Leading the way in the packaging industry for consumer products, the Quezon City based Polyseal Manufacturing Industries entered the market in the early 1960s to begin an era of innovation and set the standard for premium product seals and packaging. Initially utilizing material film from Japan, it was the first company to provide tamper proof bottle seals for top tier local corporations Polyseal quickly gained recognition as the pioneer in preventing product pilferage and contamination.

As the success of their bottle sealing technology spread throughout various industries, the Polyseal team forged ahead to create its own shrinkable film for bottle labels and product group packaging. Tapping the widening market of mineral water, liquor, pharmaceuticals, stationary, cosmetics and food bottle manufacturers, the company expanded its production base to service its growing clientele.

Presently, the company's pre-press graphic system facilitates the production of customized printing cylinders and plates. Well-organized delivery system allows Polyseal to warehouse goods and fulfill all requirements of client. At Polyseal, state-of-the-art technology coupled with cost efficiency is the fundamental key to maximizing the benefits to the customer.

Looking ahead, Polyseal continuously strives to break new ground in both local and Asian markets. With each consumer industry and every consumer individual in mind, Polyseal ultimately remains the originator of revolutionary consumer product packaging.
